(C) Carrier Selection Parameter Charge

A nonrecurring charge will apply when a customer requests the Carrier Selection Parameter optional feature described in 6.3 EE preceding. This charge does not apply if the feature is installed coincident with the initial installation of a service.

The End Office Dedicated Trunk Port rate was calculated assuming a 50/50 split of the originating and terminating traffic using this flat-rated port. The FCC in their FCC 11-161 ICC Transformation order in section 51.907(d)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate a single flat rate is generated for billing purposes. The originating rate for Hanover is \$3.60 for DS0 and \$80.00 for DS1. For all other exchanges, the originating rate is \$1.92 for DS0 and \$49.28 for DS1.

(D) Indicates decrease in rate.
